# FABRIC ISLAND DRESSING

**HIGHLY PERMEABLE WITH GOOD  
ADHESIVE STRENGTH**

Medstock Fabric Island Dressing is made of a spunlace, non-woven fabric coating with a specialised medical-grade acrylic adhesive and an absorbent fabric pad.

AVAILABLE IN 3 SIZES

## Key Functions and Features

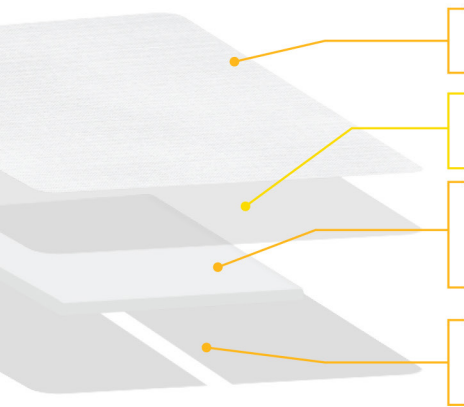

- + Creates an occlusive environment, whilst being absorbent and permeable to oxygen and moisture
- + Hypoallergenic
- + Mild peeling strength
- + Does not roll up or fall off skin
- + Prevents bacterial invasion and accelerates wound healing

## General Advice on Safe Use

- + Ensure wound area is clean and dry before application
- + Dressing pad should overlap the wound by at least 2cm onto the dry surrounding skin
- + Can be left in place for up to 5 days depending on exudate level and type of wound
- + Can be used as a secondary dressing over hydrocolloid paste, alginate and other primary dressings

## Indications for Use

- + Suitable for wounds with nil to mild exudate
- + Grazes, abrasions and superficial burns
- + Surgical wounds

- First Layer:** Spunlace non-woven
- Second Layer:** Medical grade PSA
- Third Layer:** Cotton island pad absorption rate is  $\geq 5$  times the original pad weight
- Backing Release Paper:** Glassine release liner

## Contraindications / Precautions

- + Seek medical advice immediately for all serious wounds and burns
- + If reddening or sensitisation occurs, discontinue use and consult a physician

## Storage Conditions

- + Store in a well-ventilated clean room at or below 35°C with relative humidity less than 80% and no corrosive gas

## Period of Validity

The product shall be valid for 5 years from the sterilisation date, provided that it is kept under the stipulated storage conditions

## Packaging

- + Each dressing is packaged in a paper/poly closed pouch, then packed into our unique colour coded Medstock boxes

### Care and Use Symbols

Read Instructions for use.
